CARBOHYDRATE RESEARCH

Subject index

Alpha-amylase
Purification and characterization of extracellular alpha-amylase from *Aspergillus fumigatus* 97

D-Altrose
Direct transformation of D-idose and D-altrose with potassium cyanate into cyclic carbamates of derived glycosylamines 255

N-Amidinopiperidine
N-Amidino-3,4,5-trihydroxypiperidine, a new efficient competitive β-glucosidase inhibitor C11

Amino acids
Thermodynamics of the interaction of cyclodextrins with aromatic and α,ω-amino acids in aqueous solutions: a calorimetric study at 25°C 31

Aminocyclitol antibiotic
Novel aminocyclitol antibiotics derived from natural carbohydrates C5

Amino-sugar
Synthesis of 2-acetamido-2-deoxy-5-thio-β-D-altropyranose 111

D-Arabinitol, 1,5-dideoxy-1,5-imino-, inhibition of α-L-fucosidase
Synthesis of 1,5-dideoxy-1,5-imino-D-arabinitol (5-*nor*-L-fuco-1-deoxynojirimycin) and its application for the affinity purification and characterisation of α-L-fucosidase 17

D-Arabinitol, 1,5-dideoxy,1,5-imino-, synthesis
Synthesis of 1,5-dideoxy-1,5-imino-D-arabinitol (5-*nor*-L-fuco-1-deoxynojirimycin) and its application for the affinity purification and characterisation of α-L-fucosidase 17

Arabinoxylan
Isolation and partial characterization of feruloylated oligosaccharides from maize bran 241

Aspergillus fumigatus
Purification and characterization of extracellular alpha-amylase from *Aspergillus fumigatus* 97

Azido-sugar
Synthesis of 2-acetamido-2-deoxy-5-thio-β-D-altropyranose 111

Biomedical applications
Synthetic and structural studies of α-sialyl-(2 → 6) and α-sialyl-(2 → 3) 1-deoxynojirimycin derivatives potentially useful for biomedical applications 159

BSA-conjugate
Synthesis of the saccharide moiety of galactosylgloboside (SSEA-3) and its conjugation to bovine serum albumin and Sepharose 9

Burkholderia cepacia, Methylation analysis
Characterization of a lipopolysaccharide O antigen containing two different trisaccharide repeating units from *Burkholderia cepacia* serotype E (O2) 231

Calorimetry
Thermodynamics of the interaction of cyclodextrins with aromatic and α,ω-amino acids in aqueous solutions: a calorimetric study at 25°C 31

Carob galactomannan
Binding of galactomannans to kappa-carrageenan after cold mixing 91

Carrageenan
Binding of galactomannans to kappa-carrageenan after cold mixing 91

Cellobiose
The role of deoxyhexonic acids in the hydrothermal decarboxylation of carbohydrates 191

Cell wall
Isolation and partial characterization of feruloylated oligosaccharides from maize bran 241

Characterization
Purification and characterization of extracellular alpha-amylase from *Aspergillus fumigatus* 97

Competitive inhibition
N-Amidino-3,4,5-trihydroxypiperidine, a new efficient competitive β-glucosidase inhibitor C11
p-Coumaric acid
Extraction of phenolic-carbohydrate complexes from graminaceous cell walls 41
Cross-linked polysaccharides
The reaction between epichlorohydrin and polysaccharides: Structural elements in a cross-linked dextran, Sephadex® G-25 203
Cyclic carbamates
Direct transformation of D-idose and D-altrose with potassium cyanate into cyclic carbamates of derived glycosylamines 255
β-Cyclodextrin
The role of deoxyhexonic acids in the hydrothermal decarboxylation of carbohydrates 191
Cyclodextrins
Thermodynamics of the interaction of cyclodextrins with aromatic and α,ω-amino acids in aqueous solutions: a calorimetric study at 25°C 31

D-*altro*
Synthesis of 2-acetamido-2-deoxy-5-thio-β-D-altropyranose 111
4-Deoxy-β-L-*threo*-hex-4-enopyranosyluronic acid
Characterisation of 4-deoxy-β-L-*threo*-hex-4-enopyranosyluronic acid attached to xylan in pine kraft pulp and pulping liquor by ^{1}H and ^{13}C NMR spectroscopy 55
1-Deoxynojirimycin derivatives
Synthetic and structural studies of α-sialyl-(2 → 6) and α-sialyl-(2 → 3) 1-deoxynojirimycin derivatives potentially useful for biomedical applications 159
Deoxythexonic acids
The role of deoxyhexonic acids in the hydrothermal decarboxylation of carbohydrates 191
D-*gluco*
Synthesis of 2-acetamido-2-deoxy-5-thio-β-D-altropyranose 111
Diffraction studies
The X-ray crystal structure of *N*-(1-hexadecyl)-D-gluconamide and powder diffraction studies on its lower and higher homologues ($n = 9–18$) 129
2D NMR (COSY, NOESY) experiments
Characterization of a lipopolysaccharide O antigen containing two different trisaccharide repeating units from *Burkholderia cepacia* serotype E (O2) 231

Eclipsed exocyclic carbon–oxygen bonds
Eclipsed exocyclic carbon–oxygen bonds in the hexamethyl ether of *scyllo*-inositol. X-Ray crystallographic and NMR studies 141
Enzyme purification
Purification and characterization of extracellular alpha-amylase from *Aspergillus fumigatus* 97
Epichlorohydrin
The reaction between epichlorohydrin and polysaccharides: Structural elements in a cross-linked dextran, Sephadex® G-25 203
Escherichia coli
NMR reinvestigation of two *N*-acetylneuraminic acid-containing O-specific polysaccharides (O56 and O24) of *Escherichia coli* 73

FABMS
Structural studies of the saccharide part of the cell envelope lipooligosaccharide from *Haemophilus influenzae* strain galEgalK 213
Characterization of a lipopolysaccharide O antigen containing two different trisaccharide repeating units from *Burkholderia cepacia* serotype E (O2) 231
Ferrier carbocyclization
Novel aminocyclitol antibiotics derived from natural carbohydrates C5
Ferulic acid
Extraction of phenolic-carbohydrate complexes from graminaceous cell walls 41
Isolation and partial characterization of feruloylated oligosaccharides from maize bran 241
Feruloylated oligosaccharides
Isolation and partial characterization of feruloylated oligosaccharides from maize bran 241
α-L-Fucosidase, affinity purification
Synthesis of 1,5-dideoxy-1,5-imino-D-arabinitol (5-*nor*-L-fuco-1-deoxynojirimycin) and its application for the affinity purification and characterisation of α-L-fucosidase 17
α-L-Fucosidase, characterisation of active site
Synthesis of 1,5-dideoxy-1,5-imino-D-arabinitol (5-*nor*-L-fuco-1-deoxynojirimycin) and its application for the affinity purification and characterisation of α-L-fucosidase 17
α-L-Fucosidase, inhibition
Synthesis of 1,5-dideoxy-1,5-imino-D-arabinitol (5-*nor*-L-fuco-1-deoxynojirimycin) and its application for the affinity purification and characterisation of α-L-fucosidase 17

Fungal cell-wall polysaccharides
Chemical structure of fungal cell-wall polysaccharides isolated from *Microsporum gypseum* and related species of *microsporum* and *Trychophyton* 121

Galactomannan
Binding of galactomannans to kappa-carrageenan after cold mixing 91
Galactosylgloboside
Synthesis of the saccharide moiety of galactosylgloboside (SSEA-3) and its conjugation to bovine serum albumin and Sepharose 9
β-D-Gal *p*-(1 → 3)-D-Gal *p*NAc synthons
Synthesis of disaccharide glycosyl donors suitable for introduction of the β-D-Gal *p*-(1 → 3)-α- and -β-D-Gal *p*NAc groups 1
GLC–MS of alditol acetates
Characterization of a lipopolysaccharide O antigen containing two different trisaccharide repeating units from *Burkholderia cepacia* serotype E (O2) 231
Glucose
The role of deoxyhexonic acids in the hydrothermal decarboxylation of carbohydrates 191
Glycosidases
N-Amidino-3,4,5-trihydroxypiperidine, a new efficient competitive β-glucosidase inhibitor C11
Glycosylamines
Direct transformation of D-idose and D-altrose with potassium cyanate into cyclic carbamates of derived glycosylamines 255
Glycosylation
Stereoselective glycosylation using fully benzylated pyrimidin-2-yl 1-thio-β-D-glycopyranosides 149
Glycosyl H-phosphonate
The chemical synthesis of *Leishmania donovani* phosphoglycan via polycondensation of a glycobiosyl hydrogenphosphonate monomer 179

Haemophilus influenzae
Structural studies of the saccharide part of the cell envelope lipooligosaccharide from *Haemophilus influenzae* strain galEgalK 213
Hemicellulose
Extraction of phenolic-carbohydrate complexes from graminaceous cell walls 41
N-(1-Hexadecyl)-D-gluconamide
The X-ray crystal structure of *N*-(1-hexadecyl)-D-gluconamide and powder diffraction studies on its lower and higher homologues ($n = 9–18$) 129
Hexa methyl ether
Eclipsed exocyclic carbon–oxygen bonds in the hexamethyl ether of *scyllo*-inositol. X-Ray crystallographic and NMR studies 141
Hydrothermolysis
The role of deoxyhexonic acids in the hydrothermal decarboxylation of carbohydrates 191

D-Idose
Direct transformation of D-idose and D-altrose with potassium cyanate into cyclic carbamates of derived glycosylamines 255
Inclusion
Thermodynamics of the interaction of cyclodextrins with aromatic and α,ω-amino acids in aqueous solutions: a calorimetric study at 25°C 31
scyllo-Inositol
Eclipsed exocyclic carbon–oxygen bonds in the hexamethyl ether of *scyllo*-inositol. X-Ray crystallographic and NMR studies 141
Interaction
Binding of galactomannans to kappa-carrageenan after cold mixing 91

Kappa-carrageenan
Binding of galactomannans to kappa-carrageenan after cold mixing 91

Leishmania
The chemical synthesis of *Leishmania donovani* phosphoglycan via polycondensation of a glycobiosyl hydrogenphosphonate monomer 179
Lignin
Extraction of phenolic-carbohydrate complexes from graminaceous cell walls 41
Lipooligosaccharide
Structural studies of the saccharide part of the cell envelope lipooligosaccharide from *Haemophilus influenzae* strain galEgalK 213
Lipopolysaccharide
Structure of the O6 antigen of *Stenotrophomonas* (*Xanthomonas* or *Pseudomonas*) *maltophilia* 225

Maize
Isolation and partial characterization of feruloylated oligosaccharides from maize bran 241
Microsporum
Chemical structure of fungal cell-wall polysaccharides isolated from *Microsporum gypseum* and related species of *microsporum* and *Trychophyton* 121

NMR
Structural studies of the saccharide part of the cell envelope lipooligosaccharide from *Haemophilus influenzae* strain galEgalK 213
NMR spectroscopy
NMR reinvestigation of two *N*-acetylneuraminic acid-containing O-specific polysaccharides (O56 and O24) of *Escherichia coli* 73

O24 and O56 antigens
NMR reinvestigation of two *N*-acetylneuraminic acid-containing O-specific polysaccharides (O56 and O24) of *Escherichia coli* 73
O Antigen
Structure of the O6 antigen of *Stenotrophomonas (Xanthomonas* or *Pseudomonas) maltophilia* 225
O Antigen, lipopolysaccharide
Characterization of a lipopolysaccharide O antigen containing two different trisaccharide repeating units from *Burkholderia cepacia* serotype E (O2) 231

Phosphoglycan
The chemical synthesis of *Leishmania donovani* phosphoglycan via polycondensation of a glycobiosyl hydrogenphosphonate monomer 179
Pine kraft pulp
Characterisation of 4-deoxy-β-L-*threo*-hex-4-enopyranosyluronic acid attached to xylan in pine kraft pulp and pulping liquor by ^{1}H and ^{13}C NMR spectroscopy 55
Polysaccharide structure
NMR reinvestigation of two *N*-acetylneuraminic acid-containing O-specific polysaccharides (O56 and O24) of *Escherichia coli* 73
Pseudodisaccharide
Novel aminocyclitol antibiotics derived from natural carbohydrates C5
Pulping Liquor
Characterisation of 4-deoxy-β-L-*threo*-hex-4-enopyranosyluronic acid attached to xylan in pine kraft pulp and pulping liquor by ^{1}H and ^{13}C NMR spectroscopy 55
Pyrimidin-2-yl
Stereoselective glycosylation using fully benzylated pyrimidin-2-yl 1-thio-β-D-glycopyranosides 149

Sephadex
The reaction between epichlorohydrin and polysaccharides: Structural elements in a cross-linked dextran, Sephadex® G-25 203
Sepharose-conjugate
Synthesis of the saccharide moiety of galactosylgloboside (SSEA-3) and its conjugation to bovine serum albumin and Sepharose 9
α-Sialyl-(2 → 3)
Synthetic and structural studies of α-sialyl-(2 → 6) and α-sialyl-(2 → 3) 1-deoxynojirimycin derivatives potentially useful for biomedical applications 159
α-Sialyl-(2 → 6)
Synthetic and structural studies of α-sialyl-(2 → 6) and α-sialyl-(2 → 3) 1-deoxynojirimycin derivatives potentially useful for biomedical applications 159
Stenotrophomonas maltophilia
Structure of the O6 antigen of *Stenotrophomonas (Xanthomonas* or *Pseudomonas) maltophilia* 225
Stereoselective
Stereoselective glycosylation using fully benzylated pyrimidin-2-yl 1-thio-β-D-glycopyranosides 149
Structural analysis
Structural studies of the saccharide part of the cell envelope lipooligosaccharide from *Haemophilus influenzae* strain galEgalK 213
Synthesis
The chemical synthesis of *Leishmania donovani* phosphoglycan via polycondensation of a glycobiosyl hydrogenphosphonate monomer 179
Synthetic and structural studies
Synthetic and structural studies of α-sialyl-(2 → 6) and α-sialyl-(2 → 3) 1-deoxynojirimycin derivatives potentially useful for biomedical applications 159

1-Thio-β-D-galactopyranosides
Stereoselective glycosylation using fully benzylated pyrimidin-2-yl 1-thio-β-D-glycopyranosides 149
Thioglycoside donor
Synthesis of the saccharide moiety of galactosylgloboside (SSEA-3) and its conjugation to bovine serum albumin and Sepharose 9
Thio-sugar
Synthesis of 2-acetamido-2-deoxy-5-thio-β-D-altropyranose 111
2-(Trimethylsilyl)ethyl glycoside
Synthesis of disaccharide glycosyl donors suitable for introduction of the β-D-Gal*p*-(1 → 3)-α- and -β-D-Gal*p*NAc groups 1
Synthesis of the saccharide moiety of galactosylgloboside (SSEA-3) and its conjugation to bovine serum albumin and Sepharose 9

Trychophyton
Chemical structure of fungal cell-wall polysaccharides isolated from *Microsporum gypseum* and related species of *microsporum* and *Trychophyton* 121

Xylan
Characterisation of 4-deoxy-β-L-*threo*-hex-4-enopyranosyluronic acid attached to xylan in pine kraft pulp and pulping liquor by ^{1}H and ^{13}C NMR spectroscopy 55
